### PROJECTS

#### Zen Class Clone

<https://zen-class-six.vercel.app/>

- Developed an interactive web application, Zen Class, using React and React Bootstrap to streamline educational activities and enhance communication between students and instructors.
- Demonstrated full-stack proficiency with Node.js and MongoDB, implementing features like user authentication and dashboard functionalities for leave applications and query handling.

#### Health Record Manager

<https://health-record-manager.vercel.app/>

- Developed Health Record Manager, a web app using React.js for frontend interactivity and Node.js for backend logic, ensuring a seamless user experience.
- Implemented user authentication with JSON Web Tokens (JWT) for secure access, and utilized MongoDB for efficient data storage and management.
